

# NIHAL PUSE

Full-Stack Software Engineer | Python · TypeScript · Next.js

Bhopal, India • +91 94256 75862 • [nihalpuse44@gmail.com](mailto:nihalpuse44@gmail.com)

[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

## SUMMARY

Full-stack software engineer who builds and ships production web applications end-to-end — from React/Next.js interfaces to REST API integration, application state, and PostgreSQL data layers. Strong programming fundamentals across Python, TypeScript, and JavaScript, with a focus on clean, maintainable, efficient code. Comfortable in agile, version-controlled teams and quick to pick up new stacks to deliver scalable software.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

**Backend & Data:** REST API design & integration, Python microservices, PostgreSQL (NeonDB), Drizzle ORM, Auth.js, role-based access control

**Frontend:** React.js (Hooks, Context, Composition), Next.js, Tailwind CSS, Vite, Tiptap / rich-text editors, responsive design, accessibility (WCAG), Figma-to-Code

**Practices & Tools:** Agile / SDLC, Git & GitHub, code review, testing & debugging, cross-browser optimization, Vercel, Netlify

## PROFESSIONAL EXPERIENCE

### Software / Product Developer — Scalixity

11/2025 – Present

Frontend & full-stack feature development

Remote

- Build and maintain production features across multiple live products (healthcare, e-commerce, property-management), writing clean, reusable, maintainable code in TypeScript and React.
- Integrate UI with a Python-based microservices backend over REST APIs — handling application state, data flow, and error handling end-to-end.
- Collaborate with backend and design teams in an agile workflow to design and deliver scalable, user-facing features.
- Test, debug, and optimize components for performance, accessibility, and cross-browser compatibility before release.

**Key projects:** [Docflig](#) (feed/course/webinar UI + Tiptap editor, integrated with Python microservices via REST) · [Nakshatra Gyaan](#) (e-commerce storefront + streaming AI chat) · [SmartTenantAI](#) (role-based dashboards) · [Scalixity website](#) (complete UI redesign, rebuilt from scratch).

### Development Intern — Scalixity

06/2025 – 11/2025

Frontend development & API integration

Remote, India

- Developed responsive, reusable React/Next.js components, translating Figma designs into clean, accessible interfaces.
- Consumed RESTful APIs, managed application state and data flow, and performed testing, debugging, and cross-browser performance optimization.

## PROJECTS

### Procurement Workspace — RFQ & Purchase-Order Automation Platform

Next.js, TypeScript, PostgreSQL (NeonDB), Drizzle ORM, Auth.js, Tailwind CSS, ExcelJS, Zod, Vercel

- Built a full-stack procurement platform with vendor quote comparison and L1/L2/L3 cost ranking, including a landed-cost comparison engine and a synonym-aware vendor search (Jaccard similarity).
- Designed a multi-tenant PostgreSQL schema with Drizzle ORM, Auth.js, and role-based access control; added validated forms with Zod and Excel paste-import.
- Integrated vendor-discovery APIs and automated Excel PO generation; deployed on Vercel.

### Aaj Kya Banega? — AI-Powered Meal Planning & Decision Platform

Next.js, TypeScript, PostgreSQL (NeonDB), Gemini AI, Tailwind CSS, Vercel

- Built an AI-powered platform for households to collaboratively decide daily meals.
- Implemented AI meal recommendations from ingredient availability, preferences, and history; added real-time group voting, pantry management, meal tracking, and grocery-list generation.

## EDUCATION

### Master of Computer Application (MCA)

2023 – 2025

Shri G. S. Institute of Technology and Science — 8.15 CGPA

Indore, India

Relevant coursework: Python, Data Structures & Algorithms, OOP, DBMS, Software Engineering, Web Technologies.

### Bachelor of Computer Application (BCA)

2020 – 2023

Bhopal School of Social Sciences — 75.15%

Bhopal, India
